BATTERY & FIRE PROTECTION WITH PYROBUBBLES

Innovative Ideas for Fire Protection, Fire Prevention and Extinguishing

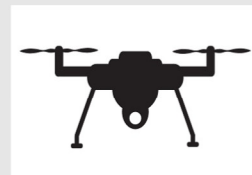

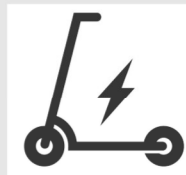

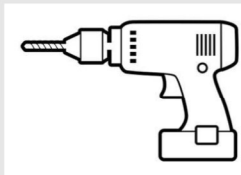

UN tested
P903 / P908
P909 / P910

**Maximum
SAFETY for
your battery**

The "BSK-1" from GENIUS

We have developed the fire protection case "BSK-1" according to the highest safety standards for the storage and transport of lithium-ion batteries. With an additional cable duct, you can not only store your batteries safely in the BSK-1, but also charge them safely. The light weight, easy handling and robust construction ensure safe use even in enclosed spaces. Your safety is important to us!

CONVINCING FEATURES

- For safe storage, transport or storage of rechargeable batteries and batteries, according to P903 / P908 / P909 and P910.
- The batteries can be charged in the case using a unique cable duct.
- Fireproof interior fittings from the areas of fire and explosion protection as well as the original dust-free PyroBubbles cushions ensure maximum safety.
- No flames or splinters escape in the event of an accident. Maximum protection.
- High puncture resistance and heat resistance, i.e. also suitable for powerful power tools or defective batteries up to 1000 Wh.
- Developed according to the latest hazardous goods technology and successfully tested in many real fire tests.
- The maximum hazardous goods weight of 8 kg and an internal size of 510 x 310 x 250 mm make the case unique.

Innovative Ideas for Fire Protection, Fire Prevention and Extinguishing

BSK-1

The fire protection case from GENIUS

Our high-quality special case is designed for the safe storage and transport of lithium-ion batteries in accordance with regulations. Regardless of whether you want to charge, transport or store batteries in a protected manner. With the BSK-1 fire protection case from GENIUS you are on the safe side. Thanks to our dust-free PyroBubbles® cushions, the BSK-1 can withstand significantly higher heat loads than, for example, rock wool or fiberglass products. Besides new or end-of-life batteries and prototypes, the case is also ideally suited for defective lithium-ion batteries. Please contact us separately for critically defective rechargeable batteries.

TECHNICAL DETAILS

- External dimensions LxWxH: 60 x 40 x 28 cm *
- Internal dimensions LxWxH: 51 x 31 x 25 cm *
- Stacking height: 28 cm *
- Empty weight: 8 kg *
- Volume: 40 liters *
- Cable feed: Included
- Number of handles: 1 handle
- Material: Polypropylene PP
- Color: Red, Olive
- Pressure venting: 2 grids
- For media: Lithium-ion batteries
- Delivery: With PyroBubbles® cushion
- Article no.: 2701

* approx. values

CONVINCING BENEFITS

- Non-flammable inner casing.
- Low weight, max. total 23 kg.
- Extremely easy to handle.
- Special explosion protection in the casing.
- Integrated pressure venting.
- Gas and filter system using PyroBubbles®.
- Can be used in enclosed spaces.
- Environmentally friendly extinguishing agent.
- Tested multiple times including UN certificate.
- Ergonomic handle.
- Extremely robust outer shell.
- Can be charged in the case.
- Striking color, also available in other colors for larger quantities.

**Maximum
SAFETY for
your battery**

The "BSK-2" from GENIUS

We have developed the new fire protection case "BSK-2" according to the highest safety standards for the storage and transport of lithium-ion batteries. With an additional cable duct, you can not only store your batteries safely in the BSK-2, but also charge them safely. The integrated trolley function means you are always mobile despite the size and weight. The easy handling and robust construction make safe use possible even in enclosed spaces. Your safety is important to us!

CONVINCING FEATURES

- For safe storage, transport or storage of rechargeable batteries and batteries, according to P903 / P908 / P909 and P910.
- Charging the batteries in the case is possible through a flexible cable duct.
- Fireproof interior fittings from the areas of fire and explosion protection as well as the original dust-free PyroBubbles® cushions ensure maximum safety.
- No flames or splinters escape in the event of an accident. Maximum protection.
- High puncture resistance and heat resistance, i.e. also suitable for powerful power tools or defective batteries up to 3000 Wh.
- Developed according to the latest hazardous goods technology and successfully tested in many real fire tests.
- The maximum hazardous goods weight of 30 kg and a maximum recommended hazardous goods size of 650 x 450 x 330 mm make the case unique.
